Brett H. Andrews

Curriculum Vitae

andrewsb@pitt.edu bretthandrews.github.io bretthandrews 0000-0001-8085-5890

Experience

Research Associate Professor 2022–present
Department of Physics and Astronomy, University of Pittsburgh

Research Assistant Professor 2017–2022
Department of Physics and Astronomy, University of Pittsburgh

Postdoctoral Associate 2014–2017
Department of Physics and Astronomy, University of Pittsburgh

Education

Ph.D. Astronomy 2014
The Ohio State University
"Decoding Galaxy Evolution with Gas-phase and Stellar Elemental Abundances"
Advisors: David H. Weinberg & Jennifer A. Johnson

M.S. Astronomy 2011
The Ohio State University

B.S. Physics & Astronomy 2008
Yale University
Nicolas Adamo Scholar-Athlete Prize (Silliman College)

Publications

4 lead author; 11 significant contributing author; 59 contributing author; 3 additional publications. Over 15,000 citations. List attached.

Presentations

4 invited; 30 contributed; 2 posters. List attached.

Funding

PI: NASA Nancy Grace Roman Space Telescope Research and Support Participation Opportunities 2023–present
Exploiting Deep Learning to Improve Roman Photometric Redshifts
$287,881

Co-I: NASA Nancy Grace Roman Space Telescope Research and Support Participation Opportunities 2023–present
A Statistical Framework for Optimizing Roman Spectroscopic Training Sets
$291,061

Co-I: NASA Nancy Grace Roman Space Telescope Research and Support Participation Opportunities 2023–present
Maximizing Cosmological Science with the Roman High Latitude Imaging Survey
$19.5M ($665,310 to Pitt)

Co-I: NASA Hubble Space Telescope Cycle 30 SNAP Proposal (409 orbits) 2023–2025
Post-starbursts from DESI: Timing quenching and morphological transformation at $1 < z < 1.3$
$202,893

Senior Personnel: NSF Major Research Instrumentation Program 2021–2024
Acquisition of Cutting-Edge GPU and MPI Nodes for the Interdisciplinary Pitt Center for Research Computing
$1,187,606

PI: NSF Astronomy and Astrophysics Research Grants 2020–2025
Interpretable and Deblended Photometric Redshifts with a Deep Capsule Network
$535,578

Co-I: NASA Astrophysical Data Analysis Program 2019–2024
Multiwavelength Milky Way Analogs
$504,949

Co-I: NASA Astrophysical Data Analysis Program (Funded Extension) 2021
Multiwavelength Milky Way Analogs
$33,707

NASA PA Space Grant Consortium Scholarships to support undergraduate research 2019–present
Zach Lewis: Fall 2019, Fall 2020, Spring 2021, Fall 2021, Spring 2022
Katie Mack: Summer 2021, Fall 2021, Spring 2022
Emma Moran: Spring 2024, Summer 2024, Fall 2024, Spring 2025
Total: $32,500

Mentoring Ph.D.

Finian Ashmead (University of Pittsburgh) 2023–present
"A Statistical Framework for Optimizing Roman Spectroscopic Training Sets for Roman Photometric Redshifts"

Yoquelbin Salcedo Hernandez (University of Pittsburgh) 2022–present
"DESI-2 Emission Line Galaxy Target Selection"

Ashod Khederlarian (University of Pittsburgh) 2022–present
"Towards Leveraging Deep Learning for Photometric Redshifts with the Roman Space Telescope"

Biprateep Dey (University of Pittsburgh) 2018–2024
"Cosmic Cartography: Photometric Redshifts for Next-Generation Sky Surveys"
Next Position: Schmidt AI for Science Fellowship at University of Toronto + CITA Fellowship + Dunlap Institute Fellowship

Troy Raen (University of Pittsburgh) 2019–2022
"Toward the Study of Stars with LSST"
Next Position: Application Developer at IPAC/Caltech

Catherine Fielder (University of Pittsburgh) 2018–2022
"Constraining the Milky Way's Ultraviolet to Infrared SED"
Next Position: Postdoctoral Researcher at University of Arizona

M.S.	**Quanbin (Eric) Ma** (Carnegie Mellon University Machine Learning Department) "Deep Dimensionality Reduction of MaNGA Data" *Next Position*: Software Engineer at Facebook	2017
Undergraduate	**Emma Moran** (University of Pittsburgh) "Improving the Physical Interpretation of Deep Neural Networks for Estimating Photometric Redshifts"	2023–present
	Zach Lewis (University of Pittsburgh) "The Gas-Phase Mass-Metallicity Relation for Massive Galaxies at $z \sim 0.7$ with the LEGA-C Survey" *Next Position*: NSF GRFP Fellow and Astronomy Ph.D. Student at the University of Wisconsin	2019–2022
	Katie Mack (University of Pittsburgh) "Comparing Stellar and Emission Line Dust Attenuation in the LEGA-C Survey"	2021–2022
	Ian Cooper (University of Pittsburgh) "SNIa Hosts in MaNGA" *Next Position*: Geophysics Ph.D. Student at Boston College	2016
High School	**Mariah Jones** (Baldwin High School) "The Mass–Metallicity Relation at Intermediate Redshifts" *Next Position*: Undergraduate Student at Vassar College	2020–2021

Service to Profession	**Invited Referee for *ApJ*, *MNRAS*, *A&A*, and *PASP***	
	Invited Reviewer for NSF and NASA	
	Faculty Hiring Committee Department of Physics and Astronomy, University of Pittsburgh – LSST LINCC Research Assistant Professor – Astrophysics or Experimental High Energy Physics with Machine Learning (Tenure-stream)	 2022–2023 2021–2022 2018–2019
	Research Faculty Promotion Criteria Committee University of Pittsburgh Dietrich School of Arts and Sciences	2024
	Union of Pitt Faculty University of Pittsburgh – Organizing Committee – Steward	 2024–present 2024–present
	Faculty Peer Buddy University of Pittsburgh	2021–2023
	SUDO Mentor LSST Dark Energy Science Collaboration (DESC)	2025

Teaching	**ASTRON 3580: Galactic and Extragalactic Astronomy** (University of Pittsburgh) Co-instructor with Jeff Newman.	Spring 2024

Member of the Graduate Faculty (University of Pittsburgh) 2024–present

Workshops

AstroPGH Python Boot Camp and Summer Seminar Series (University of Pittsburgh and Carnegie Mellon University)
• Intense three day workshop introducing the Python programming language for astrophysics/physics graduate and undergraduate students.
– Organizer. Presented lecture on Matplotlib. 2024
– Organizer. 2023
– Organizer. Presented lecture on Python and Jupyter. 2022
– Organizer. Presented two lectures on Numpy and Pandas. 2021
– Organizer. Presented eight lectures on Python basics, Astropy, Pandas, Git, and GitHub. 2020

Writing Fridays Workshops (University of Pittsburgh) 2023–present
• Led weekly writing workshops for astrophysics graduate students.

Professional Development Workshops (University of Pittsburgh)
• Co-led workshops with Rachel Bezanson for astrophysics and physics graduate students.
– CV, Resume, and Webpage Workshop 2024
– Webpage and CV Workshops 2022
– Webpage Workshop 2021
– CV, Resume, and Webpage Workshops 2020

Data Science Group Meeting (University of Pittsburgh) 2018
• Organized event series for astrophysics graduate students.

Marvin Workshops (SDSS-IV Collaboration Meetings) 2015–2017
• Led introductory workshops for users of the `Marvin` software toolkit.

Python Boot Camps (University of Pittsburgh) 2015
• Led events for undergraduate and graduate students.

Science Communication

The Ellis School (First Grade STEM Class)
– "How the Sun, Earth, and Moon align for a solar eclipse" 2024

Shadyside Presbyterian Church Nursery School (Pre-K Class)
– "A Few Beautiful Minutes: Experiencing a Solar Eclipse" 2024

Allegheny Observatory Public Lecture Series
– "The True Colors of the Milky Way" 2023

Astronomy on Tap
– "The Origin of the Elements" 2018
– "Indiana Jones and the Hidden Galaxy" w/ Courtney Epstein 2014

Learn & Earn Corporate Host 2021
Hosted intern for summer youth employment program delivered by Allegheny County, the City of Pittsburgh, and Partner4Work.

Science Olympiad 2011
Coached Grandview Heights (Ohio) Middle School team.

Collab.	**LSST Dark Energy Science Collaboration (DESC) Full Member**	2023
	SDSS-IV/MaNGA Architect	2016

Software

`flexCE`
Python package for modeling galactic chemical evolution.

`Marvin`
Python package, RESTful API, and Flask web application for accessing, visualizing, and analyzing SDSS-IV MaNGA integral-field spectroscopic data.

Brett H. Andrews

Publications

Lead Author

4. **Andrews, B. H.**, et al., 2017, *The Astrophysical Journal*, 835, 224
   Inflow, Outflow, Yields, and Stellar Population Mixing in Chemical Evolution Models
3. **Andrews, B. H.** & Martini, P., 2013, *The Astrophysical Journal*, 765, 140
   The Mass-Metallicity Relation with the Direct Method on Stacked Spectra of SDSS Galaxies
2. **Andrews, B. H.**, et al., 2012, *Acta Astronomica*, 62, 269
   Principal Component Abundance Analysis of Microlensed Bulge Dwarf and Subgiant Stars
1. **Andrews, B. H.** & Thompson, T. A., 2011, *The Astrophysical Journal*, 727, 97
   Assessing Radiation Pressure as a Feedback Mechanism in Star-forming Galaxies

Sig. Contrib. Author

11. Khederlarian, A., Newman, J. A., **Andrews, B. H.**, et al., 2024, *Monthly Notices of the Royal Astronomical Society*, 531, 1454
    Emission Line Predictions for Mock Galaxy Catalogues: a New Differentiable and Empirical Mapping from DESI
10. Lewis, Z., **Andrews, B. H.**, et al., 2024, *The Astrophysical Journal*, 964, 59

Presentations

Invited

Effective Plotting — 2021
DESI Collaboration Meeting

Hidden in Plain Sight: a Deep Learning Approach to Finding Supernovae in Galaxy Maps — 2018
Science 2018, University of Pittsburgh

The SDSS-IV MaNGA Survey: Galaxy Dissection on an Industrial Scale — 2017
CMU Astro Seminar, Carnegie Mellon University

The Mass–Metallicity Relation in SDSS Using Electron Temperature Measurements — 2015
Understanding Nebular Emission in High-Redshift Galaxies, The Carnegie Observatories

Contributed

Optimizing Roman Photometric Redshifts — 2024
Roman HLIS Cosmology PIT Meeting, California Institute of Technology

Photometric Redshifts for Next Generation Imaging Surveys — 2024
DHWFest, University of Utah

Jumpstart Your Paper — 2022
AstroPGH Summer Seminar, University of Pittsburgh

AstroCoffee Tips — 2022
AstroPGH Summer Seminar, University of Pittsburgh

Leveraging Statistics and Machine Learning for Probing Galaxy Evolution and Measuring Galaxy Distances — 2022
AstroLunch Seminar, University of Pittsburgh

Effective Plotting — 2021
AstroPGH Summer Seminar, University of Pittsburgh

Effective Plotting — 2020
AstroPGH Summer Seminar, University of Pittsburgh

Effective Plotting — 2018
Astro Student Seminar, University of Pittsburgh

GitHub Flow — 2018
Astro Student Seminar, University of Pittsburgh

MaNGA DAP — 2017
SDSS-IV Collaboration Meeting, Pontificia Universidad Católica de Chile

Streamlining MaNGA Data with Marvin — 2017
AstroLunch, University of Pittsburgh

The State of Marvin — 2016
SDSS-IV Collaboration Meeting, University of Wisconsin

AstroCoffee Presentation Advice — 2016
Astro Student Seminar, University of Pittsburgh

Marvin-tools: Distilling DAP Measurements and & Stacking Spectra — 2016
MaNGA Collaboration Meeting (Cocoa Beach, FL)

Global vs. Resolved Metallicities — 2015
Astro Student Seminar, University of Pittsburgh

Global vs. Resolved Metallicities — 2015
SDSS-IV Collaboration Meeting, Instituto Física Teórica Universidad Autónoma de Madrid

MaNGA Data Analysis Pipeline Quality Assessment — 2015
MaNGA Collaboration Meeting, University of Kentucky

Principal Component Abundance Analysis: APOGEE and flexCE — 2015
Local Group Astrostatistics Conference, University of Michigan

Understanding the Bimodality in [alpha/Fe] with a Chemical Evolution Model — 2014
SDSS-III Collaboration Meeting (Park City, UT)

Applying Principal Component Analysis to APOGEE — 2014
SDSS-IV Collaboration Meeting (Park City, UT)

Exploiting Large Multi-element Stellar Abundance Surveys 2014
AAS Winter Meeting

Decoding Galactic Chemical Evolution with Gas-phase and Stellar Abundances 2013
Colloquium, University of Wisconsin

Yields, Delays, and Mixing in Chemical Evolution Models 2013
SDSS-II Collaboration Meeting, Johns Hopkins University

Decoding Galactic Chemical Evolution with Gas-phase and Stellar Abundances 2013
Yale Center for Astronomy & Astrophysics Seminar, Yale University

The Mass–Metallicity Relation: A Window Into Galaxy Evolution 2013
Seminar, National Radio Astronomical Observatory

The Galaxy Mass–Metallicity Relation: A Sensitive Diagnostic of the Processes That Drive Galaxy Evolution 2013
Edward F. Hayes Graduate Research Forum, The Ohio State University

Characterizing the Distribution of Stars in Chemical Abundance Space 2013
APOGEE Collaboration Meeting, The Carnegie Observatories

Accounting for Stellar Abundance Uncertainties in Principal Component Abundance Analysis 2012
APOGEE Collaboration Meeting, Texas Christian University

Principal Component Abundance Analysis: Finding the Principal Components of Chemical Abundance Space 2011
SDSS-III Collaboration Meeting, Vanderbilt University

Radiation Pressure Feedback in Galaxies 2011
Edward F. Hayes Graduate Research Forum, The Ohio State University

Posters

Principal Component Abundance Analysis and Chemical Evolution Models 2014
The Near-Field Deep-Field Connection, University of California, Irvine

Assessing Radiation Pressure as a Feedback Mechanism in Star-forming Galaxies 2011
The 5th Zermatt ISM Symposium
